Structural Warranty

Watters and Associates Landscape warrants to the original owner that the pool shell will remain sound for as long as they own their pool. Structurally sound is defined as maintaining the structural integrity of the concrete pool shell so as to withstand all the loads without cracking and causing water loss. Should the shell be determined not to be structurally sound, Watters and Associates Landscape will at no cost to the original owner, perform repairs necessary to restore its structural integrity and water holding ability. The term “structurally sound” therefore does not extend to cover items external to the pool, such as tile, plaster, plumbing, electricity, filter, heater, decking, or pool accessories.

5 Year Underground Warranty

All underground pool plumbing is warranted to be free of defects in the workmanship and material for a period of five years to the original owner from the original start-up date.

1 Year Protection Warranty

All workmanship on construction of tile, decks, coping, stonework, and other accessories installed by Watters and Associates Landscape, are covered by the 1 year workmanship protection warranty to the original owner, from the original start-up date.

Warranty of Pool Equipment and Interior Pool Finishes

All plaster finishes carry a one year warranty from date of original start-up. All Pebbletec finishes carry a 15 year manufacturers warranty to the original owner and from the original start-up date. Pool equipment carries a one year warranty from the manufacturer except when three or more pieces of Pentair equipment are used in the pool. A three year warranty is then extended from the manufacturer on all Pentair equipment on pad, (pumps, filter, heater, cleaner, automation, salt chlorine generators).

Limitations

Defects or failures caused by lack of maintenance, proper care and/or correct water chemistry. After one year there will be a fee per service call. The swimming pool shall be kept full of water at all times except for the purposes of repair or maintenance not to exceed two days. The swimming pool shall be used in a normal and reasonable manner. (Plaster pools should not be drained when it is 90 degrees or more outside.)

For any other manufacturer’s warranties, please refer to the manufacturer’s literature, handbooks, guidebooks, owner’s manuals, and warranty cards.

For any other questions or concerns, please contact Watters and Associates Landscape Swimming Pool Division.
